

IGOR SZUNIEWICZ

TECHNICAL SOUND DESIGNER / AUDIO PROGRAMMER

I build audio that reacts to the player - spatial sound in VR, real-time ML tools, plugins in C++/JUCE. Classically trained pianist.

SKILLS

- Sound design
- Audio implementation
- Music composition
- Spatial audio
- Adaptive music
- Audio programming

TOOLKIT

Wwise · FMOD · MetaSounds · UE5 · Unity · Steam Audio · REAPER · Pro Tools · C++ · C# · Python · JUCE · Perforce · Git

LANGUAGES

Polish	native
English	fluent
German	basic

INTERESTS

DSP & audio research · Javelin throw · Swimming · Gym

01 EXPERIENCE & RESEARCH

2026 - PRESENT · FREELANCE

Freelance Sound Designer · Games

Independent sound design and audio implementation for game projects.

FEB - JUN 2026 · BELGIUM

Technical Sound Designer · XR Labs

VR training for police, military and customs, built in Unity.

- Spatial audio in Steam Audio: trainees locate a shot by ear and hear when a wall is in the way. Tuned in-headset.
- Built the weapon audio system and designed Taser T10 sounds, layered from library recordings.

2024 - 2026 · HOWEST DAE

AI Audio Research · Bachelor thesis

Measured how long a generated sound takes to reach the player after an in-game event: Unreal client, Python generation server, cache and synthesis fallback. 68-page thesis, published 2026.

02 SELECTED PROJECTS

Shadow Frames TEAM 2025

Sole audio on a UE5 horror game found by listening: 200+ Wwise events, voice acting, a mix that reacts to enemy distance.

SIDAR NULL SOLO IN DEV

A horror prototype navigated by sound: a scanner reveals the level through audio. Game design, C++ and Wwise, all solo.

Not Today, Darling! TEAM 2025

Four-player kart racer: MetaSounds engines for each kart and a priority mix built for pile-ups.

Transientica SOLO 2025 - NOW

A rhythm game played by beatboxing: my own KNN classifier recognises each hit live, written from scratch in C#/Unity.

AudioQ SOLO 2024

Granular VST3 sampler, written in C++/JUCE.

03 EDUCATION

STARTS SEP 2026

Master - Sound Design

FH Joanneum, Graz, Austria

2023 - 2026

Bachelor - Game Sound Integration

Howest DAE, Kortrijk, Belgium

Thesis: Generative AI for Real-Time Adaptive Game Audio

2013 - 2019

Classical Piano & Music Theory

State Music School, Kołobrzeg, Poland
