**PORTFOLIO**
igorszuniewicz.com

**LINKEDIN**
linkedin.com/in/igorszuniewicz

**GITHUB**
github.com/Szunias

## CORE SKILLS

**Game audio**
Sound design · implementation · spatial audio · interactive mixing

**Engines and middleware**
Unreal Engine 5 · Unity · Wwise · MetaSounds · Steam Audio

**Code and workflow**
C++ · C# · Python · Blueprints · REAPER · Perforce · Git

## EDUCATION

**2023 - 2026**
**Bachelor of Digital Arts and Entertainment**
Game Sound Integration
Howest DAE, Belgium
Thesis: latency and quality in real-time AI-generated game audio

**2013 - 2019**
**Classical Piano and Music Theory**
State Music School, Kołobrzeg

## LANGUAGES

| | |
|---|---|
| **Polish** | Native |
| **English** | Fluent |
| **German** | Basic |

## INTERESTS

Javelin throw · swimming · gym and fitness

TECHNICAL SOUND DESIGN · GAME AUDIO · VR

# Igor Szuniewicz

**Technical Sound Designer** / Audio Programmer

I design sound and wire it into games: spatial VR audio in Unity, Wwise systems in Unreal and practical tools for production.

## Experience

PROFESSIONAL

### Technical Sound Designer

Feb 2026 - Jun 2026

**XR Labs Belgium · Brussels, Belgium**

Unity · Steam Audio · Perforce · VR / AR training

> Designed and implemented audio for selected VR and AR training simulations.

> Built direction, wall occlusion and indirect paths, plus near/far weapon layers that change with distance.

## Selected Work

CASE STUDIES LINKED

**01** **Shadow Frames** > — 2025

**Sole Audio Designer · Wwise · Unreal Engine 5 · C++**

Created cues that lead players to ten changes, then implemented and mixed **all game audio** in Wwise and Unreal.

**02** **Not Today, Darling!** > — 2025

**Sole Audio Designer · Shipped game · MetaSounds · Unreal Engine 5**

Built reactive kart engines and a priority mix that stayed readable within a **32-source limit**.

**03** **AI Audio Research** > — Thesis 2026

**Sole Researcher · Unreal Engine 5 · Python · 68 pages**

Built an end-to-end latency prototype; four AI configurations took **1.9-3.5 s at p95** against a 150 ms interaction budget.

**04** **Wwise Implementation Exercises** > — 2021 - 2024

**Sole Implementer · Unity · Wwise · Android**

Kept gunshots audible beyond a **256-voice limit** and cut silent-gap asset memory by **about 80%** on Android.
