THESIS RESEARCH

Generative AI for Real-Time Adaptive Game Audio

Digital Arts & Entertainment / 2025 - 2026

Helping sound designers and small studios create richer, more immersive audio. Building real-time generation tool between Unity and ElevenLabs to make dynamic, state-responsive sound possible without sampling libraries or massive budgets.

Supervisor: Roel Demeulemeester

EDUCATION

2023-2026
Bachelor - Game Sound Integration
Howest University of Applied Sciences
Kortrijk, Belgium

2019-2023
Mathematics & Physics
Nicolaus Copernicus High School
Kolobrzeg, Poland

2013-2019
Classical Piano & Music Theory
First Degree State Music School
Kolobrzeg, Poland

SKILLS

Audio Implementation
Wwise, FMOD, MetaSounds, Unreal Engine 5, Unity

Programming
C++, C#, Python, JUCE, TensorFlow, OSC, Git, Perforce

Production
Reaper, Studio One, Logic Pro, Ableton Live, PureData

Processing & Plugins
iZotope RX, FabFilter, Waves, UAD

Spatial Audio
Dolby Atmos, 5.1 Surround, Ambisonics, Binaural

WORK EXPERIENCE

SOUND DESIGNER & AUDIO IMPLEMENTER | SHADOW FRAMES

Digital Arts & Entertainment / Sep 2025 - Present

Multi-institutional horror game project collaborating with RITCS and Ghent Conservatory. Built interactive ambience systems using C++ delegates and RTPC parameters in Wwise.

- Developed adaptive ambience responding to gameplay using C++ delegates and RTPC-driven soundscapes for horror atmosphere
- Implemented dynamic audio system with Wwise switch containers and parametric curve mapping

---

AUDIO PROGRAMMER & DESIGNER | TRANSIENTICA: AUDIOLAB

Digital Arts & Entertainment / Feb 2025 - Jun 2025

Real-time ML beatbox classifier with ~45ms end-to-end latency using Python, TensorFlow, and Unity.

- Processed 44.1 kHz audio with MFCC extraction and neural network across 5 categories
- Implemented low-latency OSC protocol for audio-to-game communication with audio-reactive visuals

---

INTERACTIVE MUSIC COMPOSER | RAY ANIMATION

Digital Arts & Entertainment / Sep 2024 - Dec 2024

Music composition for 3D animation team's graduation project. Created interactive disco score that dynamically responds to character actions, requiring precise synchronization with visual narrative.

- Composed interactive disco score synced to character behavior and animation timing in real-time
- Replaced conservatory composer mid-project, delivered complete soundtrack under tight deadline contributing to project success
